**MATERIAL:**

The Cylindrical Vertical Bike Rack is completely fabricated from steel for durability. Once constructed, the racks are then sandblasted and powder coated to a variety of colors. The stem section of the rack is constructed from 7" Pipe, while the bike holders are constructed from 10 gauge 3x1" channel iron. The locking bar and tire guards are constructed from 1x1/4" steel.

**FINISH:**

All bike racks are sandblasted and powder coated for a durable, long lasting finish. Standard powder coating colors include black or white. An additional color change fee will apply for other colors. The Cylindrical Racks are also available in a two tone color scheme (as pictured).

**ASSEMBLY:**

The Cylindrical Racks require no assembly other than bolting down to a concrete surface.

**MAINTENANCE:**

The racks are virtually maintenance free and require no upkeep, other than periodic cleaning with a rag and water to remove any surface dirt.
