**DOUBLE WALL UNIT
 VERTICAL BIKE RACK**

Item #101

Two bike capacity, sandblasted and powder coated, wall mounted bike rack

MATERIAL:

The Double Wall Unit Vertical Bike Rack is completely fabricated from steel for durability. Once constructed, the racks are then sandblasted and powder coated to a variety of colors. Two fastening plates allow for bolting the rack in place on any concrete or block wall with the supplied fastening bolts. The bike holders are constructed from 10 gauge 3x1" channel iron, while the locking bar and tire guards are constructed from 1x1/4" steel.

FINISH:

All bike racks are sandblasted and powder coated for a durable, long lasting finish. Standard powder coating colors include black or white. An additional color change fee will apply for other colors.

ASSEMBLY:

The Double Wall Unit requires no assembly other than mounting to a concrete or block wall with the provided fastening bolts at a height of 58 inches from the ground (top of rack).

MAINTENANCE:

The racks are virtually maintenance free and require no upkeep, other than periodic cleaning with a rag and water to remove any surface dirt.
