**SINGLE WALL UNIT
 VERTICAL BIKE RACK**

Item #100

Single bike capacity, sandblasted and powder coated, wall mounted bike rack

MATERIAL:

The Single Wall Unit Vertical Bike Rack is completely fabricated from steel for durability. Once constructed, the racks are then sandblasted and powder coated. Two fastening tabs are supplied for the top section with pre drilled holes for bolting the rack in place on any concrete, block, or wood wall with the supplied fastening bolts. The main section of the rack is constructed from 10 gauge 3x1" channel iron, while the locking bar and tire guards are constructed from 1x1/4" steel.

FINISH:

All bike racks are sandblasted and powder coated for a durable, long lasting finish. Standard powder coating colors include black or white. An additional color change fee will apply for other colors.

ASSEMBLY:

The Single Wall Unit requires no assembly except for the wall mounting and securing tabs (reference the Single Wall Unit Installation Guide).

MAINTENANCE:

The racks are virtually maintenance free and require no upkeep, other than periodic cleaning with a rag and water to remove any surface dirt.
