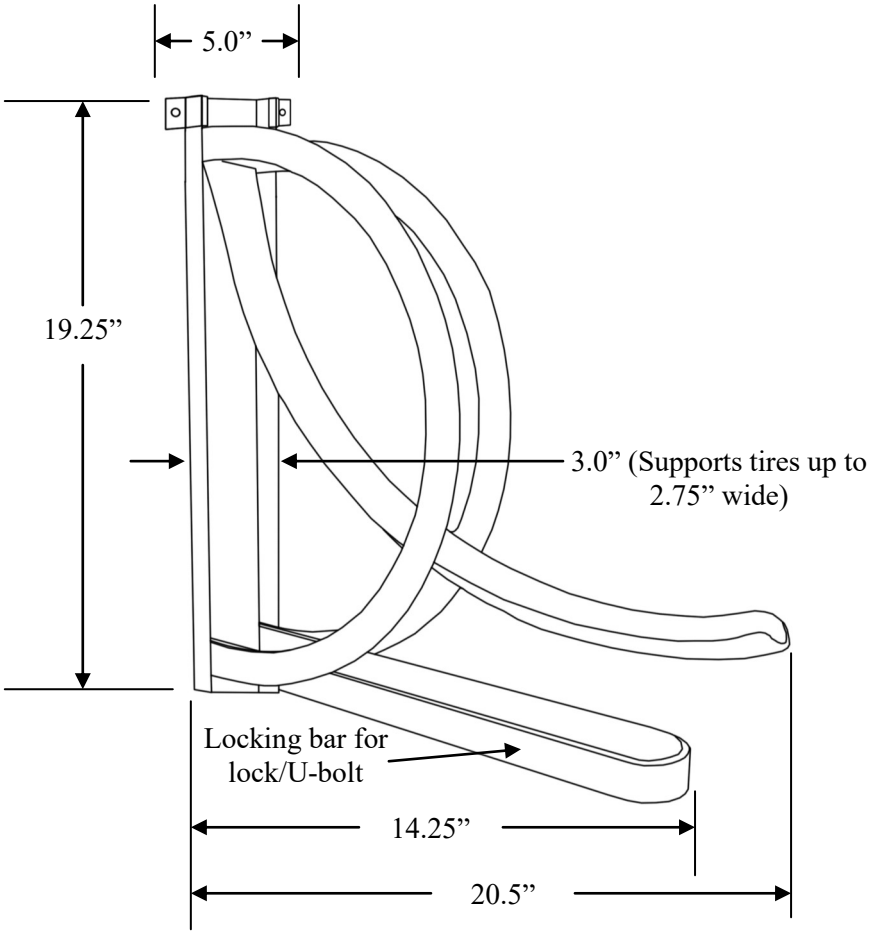
SINGLE WALL UNIT
VERTICAL BIKE RACK
Item #100

Single bike capacity, powder coated, wall mounted bike rack

MATERIAL:
The Single Wall Unit Vertical Bike Rack is completely fabricated from steel for durability. Once constructed, the racks are then powder coated. Two fastening tabs are supplied for the top section with pre drilled holes for bolting the rack in place on any concrete, block, or wood wall with the supplied fastening bolts. The main section of the rack is constructed from custom bent 12 gauge 3x1" channel iron, while the locking bar and tire guards are constructed from custom bent 1x1/4" flat bar.

FINISH:
All bike racks are powder coated our standard black color for a durable, long lasting finish.

ASSEMBLY:
The Single Wall Unit requires no assembly except for the wall mounting and securing tabs (reference the Single Wall Unit Installation Guide).


MAINTENANCE:
The racks are virtually maintenance free and require no upkeep, other than periodic cleaning with a rag and water to remove any surface dirt.
