MATERIAL:

The Steel Bench is completely fabricated from steel for durability. Once the main frame is constructed, it is then sandblasted and powder coated to a variety of colors. The frame is fabricated from 2" steel tubing, with four steel plates on the base of the legs for easy fastening to a concrete surface. Rounded corners (elbows) are available for an additional charge.

FINISH:

All benches are sandblasted and powder coated for a durable, long lasting finish. Standard powder coating colors include black or white. An additional color change fee will apply for other colors. The seating and back are available in either moisture shield lumber (see online webpage for color options), or wire mesh.

ASSEMBLY:

The benches require no assembly other than bolting down to a concrete surface if desired (not required).

MAINTENANCE:

The benches are virtually maintenance free and require no upkeep, other than periodic cleaning with a rag and water to remove any surface dirt.

**STEEL BENCH
 MOISTURE SHIELD/WIRE MESH**

Item #200

Sandblasted and powder coated steel frame, with moisture shield lumber or wire mesh seating.
