MATERIAL:

The Steel Gazebo is completely fabricated from steel for durability. Once the main frame is constructed, it is then sandblasted and powder coated to a variety of colors. Each wall panel is fabricated from 2x4" steel posts which are connected together on site to form the bottom section of the gazebo. The roof and cupola are constructed from 1 1/2" steel tubing, which is overlaid with diamond checkered aluminum plates for the roof.

FINISH:

All gazebos are sandblasted and powder coated for a durable, long lasting finish. Standard powder coating colors include black or white. An additional color change fee will apply for other colors. Standard seating is wire mesh. Gazebos are also available in a walk-through model, with two entrances on opposite sides.

ASSEMBLY:

Rinas Fabrications delivers and completely assembles our gazebos on site. A concrete pad (at least 14'x14') is required for installation.

MAINTENANCE:

The gazebos are virtually maintenance free and require no upkeep, other than periodic cleaning with a rag and water to remove any surface dirt.

**STEEL GAZEBO
 MOISTURE SHIELD/WIRE MESH
 Item #300**
